Education

Bengaluru University

Bachelor of Computer Applications(DGPA of 7.30)

August 2018 - July 2021

Bengaluru, India

Experience

dr.DataTech21

September 2022 – August 2024

UI/UX

Jaipur, India

- Contributed to the development and refinement of user interface designs by collaborating with senior designers and stakeholders, incorporating feedback to enhance usability and aesthetics
- Assisted in conducting user research, including usability testing and user interviews, to gather insights and inform design decisions, contributing to the creation of user personas and journey maps.
- Played a key role in prototyping interactive designs using tools like Figma or Adobe XD, and conducting usability testing sessions to validate design assumptions and gather actionable insights.

Ineuron.AI

March 2022 – August 2022

Front-End Intern

Bengaluru, India

- Developed multiple APIs to extract data from MongoDB, enhancing system functionality.
- Collaborated cross-functionally to troubleshoot and resolve technical issues.
- Demonstrated strong problem-solving and communication skills in a fast-paced environment.

Projects

Zomato Wrap | | Link

4

- Designed and implemented a comprehensive "Wrapped" feature for a restaurant app, creating engaging visual summaries and data visualizations.
- Developed intuitive interfaces for seamless user interactions, focusing on user-friendly design and efficient navigation.
- Integrated background trailer playback feature to provide immersive content previews, enhancing user engagement and retention

Carnival | | Link

4

- I Designed and executed branding materials for Zomato Gold Carnival, including innovative artwork and visually compelling designs for event collateral.
