Education

Bengaluru University

Bachelor of Computer Applications(DGPA of 7.30)

August 2018 - July 2021

Bengaluru, India

Experience

Ineuron.AI

Front-End Intern

March 2022 – August 2022

Bengaluru, India

- Developed multiple APIs to extract data from MongoDB, enhancing system functionality.
- Collaborated cross-functionally to troubleshoot and resolve technical issues.
- Demonstrated strong problem-solving and communication skills in a fast-paced environment.

dr.DataTech21

UI/UX

September 2022 – August 2024

Jaipur, India

- Contributed to the development and refinement of user interface designs by collaborating with senior designers and stakeholders, incorporating feedback to enhance usability and aesthetics
- Assisted in conducting user research, including usability testing and user interviews, to gather insights and inform design decisions, contributing to the creation of user personas and journey maps.
- Played a key role in prototyping interactive designs using tools like Figma or Adobe XD, and conducting usability testing sessions to validate design assumptions and gather actionable insights.

Projects

Video Volta | *React.js, Tailwind-Css, React-Hooks* | [Link](#)

4

- Developed intuitive UI/UX interfaces for streamlined user interactions, including error handling and form validation.
- Developed intuitive interfaces for seamless user interactions, focusing on user-friendly design and efficient navigation.
- Integrated background trailer playback feature to provide immersive content previews, enhancing user engagement and retention

Swiggy App | *React Js, Swiggy-Real-API* | [Link](#)

4

- Integrated Swiggy's Live API to fetch real-time data, enabling users to browse restaurants.
- Developed config-driven UI for easy visual customizations, minimizing code modifications.
- Implemented features like Shimmer-UI, Lazy Loading, Dynamic routing.

Social-App | *React.js, NodeJS, MongoDB and Express* | [Link](#)

4

- Authenticated and authorized users with JWT, creation, deletion, and enhancing user experience with dark and light themes.
- Created a system allowing users to follow and unfollow others.
- Engineered a Full Stack website with features for liking, unliking, and engaging in threaded discussions using MongoDB for data storage.

Achievements

- * Google UX Design Professional Certificate - Acquired comprehensive skills in UX design including user research, wireframing, and prototyping
- * Received recognition and awards for contributions made during these activities, highlighting the effectiveness and impact of my skills in competitive programming environments.
- * Runner-up for Skill-Mapper initiatives at HackerVerse within the organization, cultivating a culture of continuous learning and growth.
